RE: MB Docket No. 04-233

My husband is in the military and we move every three years. One of the nice things that we take with us with every move is the radio station K-LOVE. This Christian station is received at 88.1 FM in the Omaha, Nebraska area which is where we are currently residing. K-Love is very important to our family. It broadcasts uplifting music and instills positive messages to our entire family. It not only blesses us, but all listening families across the United States. If the broadcast service (LPFM) is permitted in our area, we may lose this radio station that is so dear to our family. Please do not allow the LPFM to expand so that it has a negative effect on K-Love and other positive radio stations.
